GitHub: github.com/ShimboJr | Portfolio: shimbojr-portfolio.vercel.app | LinkedIn: linkedin.com/in/shimbojr

PROFESSIONAL SUMMARY

MERN stack developer who designs, builds and deploys complete web applications on his own. Trained in full stack development at SQI College of ICT and has two full MERN applications live (CivicFix and Tradiary) plus a REST API project (SJrMusic). Started in frontend development, building fintech interfaces, and now works across React, Node.js, Express and MongoDB. Self-directed, and comfortable working remotely.

TECHNICAL SKILLS

Frontend: React.js, JavaScript (ES6+), HTML5, CSS3, Bootstrap 5

Backend: Node.js, Express.js, RESTful APIs, authentication (Google sign-in, email and password, role-based access)

Databases: MongoDB (Mongoose, Atlas), PostgreSQL (basic)

Tools: Git, GitHub, Vercel

PROJECTS

CivicFix – Community Issue Reporting Platform (MERN)

Live: sjr-civicfix.vercel.app

- Built and deployed a full stack MERN application (React, Node.js/Express, MongoDB) as my Level 3 project at SQI College of ICT.
- Implemented role-based access and dashboards for residents, administrators and staff, covering issue reporting, assignment and status tracking.
- Built an emergency reporting module with photo and short-video evidence uploads and a verified static emergency-number directory.
- Built live location sharing with a one-tap SOS trigger and an admin live map that updates by polling.
- Diagnosed and fixed a web-only bug where location updates failed silently, and configured Mongoose connection pooling to clear MongoDB Atlas connection-limit warnings.

Tradiary – Free Trading Journal Web App (MERN)

Live: tradairy.vercel.app

- Built and deployed a free trading journal web app for traders using MongoDB, Express.js, React and Node.js.
- Implemented sign-up and sign-in with Google and with email and password.
- Delivered end to end on my own: React frontend, Express REST API and MongoDB database, now live.

SJrMusic – REST API Project (Node.js)

- Designed and built a music-themed application with RESTful API endpoints to demonstrate backend API development with Node.js.

TRAINING & EDUCATION

Full Stack Web Development Programme – SQI College of ICT

2026 – Present

- Six months in: covered the full MERN stack (MongoDB, Express.js, React, Node.js) in Level 3, learned PostgreSQL fundamentals, and built CivicFix as the Level 3 project.
- Continuing into the advanced levels of the programme.

B.Tech – Ladoke Akintola University of Technology (LAUTECH)

2022 – Present
